

SOUND REVOLUTION

E-ZONE MT3131 is an absolutely unrivaled product on the market of computer accessories designed to all those looking for innovative solutions!

These small-size, portable speakers are an indispensable complement of voyagers. **With the built-in radio and MP3 player, you can enjoy your favorite music and radio stations anywhere:** at Home, in the car, on a trip, a picnic, in the train or bus, with the possibility of connecting headphones if you need more privacy.

Any software or power supply is not necessary – just insert the simple batteries or rechargeable batteries and memory card, turn on the speakers and enjoy a deep, expressive sound offered by the E-ZONE.

E-ZONE is even more functional, because besides SD memory cards it supports also other USB storage devices. SO when you get bored of music from your SD card you can play MP3 files from your memory stick or via AUX line connecting the E-Zone directly to your computer, MP3 player or other multimedia audio device – and then your playlist will never bored you again.

Dual power supply (with a popular BL-5B battery or 4 AAA batteries) combined with the technology ensures low power consumption make you enjoy the music even longer.

E-ZONE speakers were equipped with special removable and folding stand which allows convenient placing on any flat surface and after folding you can hide it easily in small pocket of your bag or backpack. It makes them even more mobile.
